Zoom in, within loaded data

short read

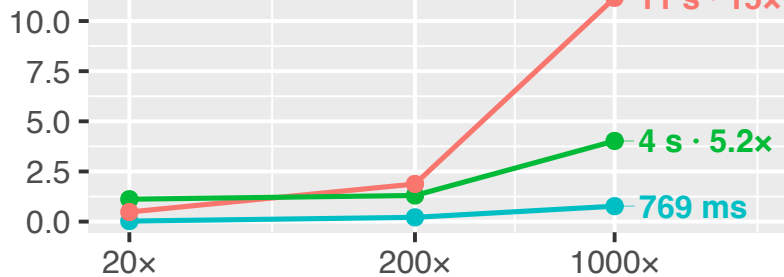

Zoom in, within loaded data

long read

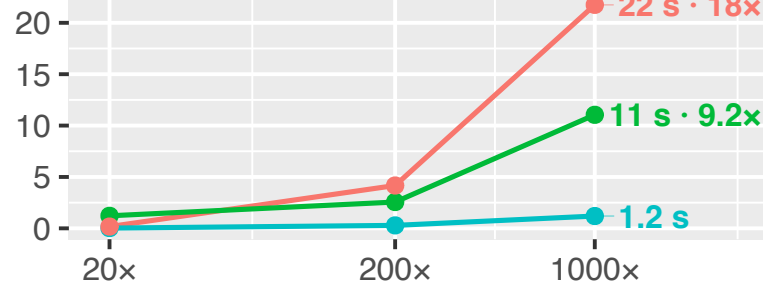

Pan, both refetch

short read

Pan, both refetch

long read

coverage

time-to-content after a 2x zoom in and after a one-viewport pan,
median of five steps; zero is a redraw with no refetch.

*Bold: that release's time at 1000x, and how many times slower
that is than this work at the same point*
