

Where a coarsened alignment record draws, against the alignment it stands for

hs1 chr5 (53.9 Mb) against mm39 chr13, the record whose coarsened encoding deviates most.
Drawn at 10,000 bp per pixel, the zoom the coarse tier is served at; the shaded band is one pixel.

-  Cut at indels of 10 kb or more, no CIGAR (worst of all 75,076 records: 7.12 px)
-  Coarsened record (worst of all 75,076 records: 0.87 px)
