

a What a wasm port of each routine could gain, at most

■ room for a port ■ no room: the copy costs more

b Where that ceiling comes from: the price of crossing

○ short reads (Illumina, 300x) △ long reads (ONT, chr22)

Bar: the whole file. Whisker: the same ceiling across the payload sweep; its far end is the single-block cell, where both sides are a microsecond apart.
Triangle: @gmod/bgzf-filehandle's shipped Rust/libdeflate inflate, against the pako path the same library resolves to in a browser.
Minima over 21 repetitions on a loaded box — read the ratios, not the milliseconds.
