

Where a coarsened alignment record draws, against the alignment it stands for

chr5 vs chr13 (53.9 Mb), the record whose coarsened encoding deviates most.

Drawn at 10,000 bp per pixel, the zoom the coarse tier is served at; the shaded band is one pixel.

- Split at large indels, CIGAR dropped — worst 7.12 px over 75,076 records
- Coarsened record (cr:Z:) — worst 0.87 px over 75,076 records
