

● Release 2.4.0
 ● This work
 ● igv.js 3.8.5
 ● GenomeSpy 0.85.0

100 kb window, navigation to render-complete,
median of three interleaved rounds in one session.

Bold: that tool's time at its last coverage, and how many times
slower that is than this work at the same point.

Hollow: gave up at the paint ceiling.

GenomeSpy reads no CRAM, so it has no curve in the right-hand panels.
